REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the claimed substrate transfer module with the features of a substrate transfer chamber and substrate transfer robot with a contamination control unit circulating purge gas then re-supplying the circulated purge gas into the chamber and removing contaminants and particles from the circulated purge gas is not found in the prior art either singly or in combination. The closest prior art are considered Barber et al. (US 6,497,734) and Wu et al. (US 6,610,123). Barber teaches a substrate transfer chamber and loader arm but not the claimed contamination control unit. Wu teaches purge gas recirculation after contaminant removal but not the claimed transfer chamber or transfer robot. Other prior art references cited in this action along with Barber and Wu, are considered to teach one or more claimed elements but not the necessary motivation or combination suggestion to obviate the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Gravini whose telephone number is 571 272 4875. The examiner can normally be reached on normal weekday business hours (east coast time).
